

Touropean in Germany

Sunday, 8th March

First we picked up the students after they had arrived. Then we drove home to show them where they will sleep. Niklas showed Mathias his bike and after that they ate dinner. After this they played a lot of video games and some cool drifting games. At half past nine we went to bed and slept.

Monday, 9th March

In the morning it was hard to wake up for Mathias because in Norway school starts one hour later. Then we were driven by Niklas' mom to school and came to our first meeting. There we got to know each other. At 9.55 a.m. we were going outside because it was break-time. Twenty minutes later we took a trip around the school and visited the art room, the biology room and the gym hall. There we played some basketball and volleyball. Then we started working on the laptops for our online blog. Now we are looking forward to having a great week with a lot of different activities and new friends. Hopefully we will also keep contact.

Tuesday, 10th March

The first thing we did in the morning, was a 30min drive from the school to Castle Berwartstein. After that we hiked to a watchtower nearby the castle and then to the castle. It was a bit rainy so we were tired and wet. At the castle we got a tour around and learned a bit about it. When we finished the tour we took the bus to another castle that was a bit more like a lost place. After that we drove home and then we spend the rest of the day in Kaiserlautern at a shopping mall.

Wednesday, 11th March

Firstly at half past 7 we went to the the ice rink in Zweibrücken and stayed there 4 hours. In the ice rink we played tag and drunk some slushies. After visiting the ice hall we drove to the golf curt in Rieschweiler and learned how to play golf. When all finished playing we drove back to school.

Thursday, 12th March

On Thursday we went to a Technical museum in Speyer. The drive was really long and the students got to see a lot of pretty places on the way. When we arrived at the museum we split up in groups and looked around. We saw lots of plains, cars, trains, bikes and a spaceship. Because of the

windy and rainy weather the place wasn't too crowded. After our time to look around that got shortened by an hour we went to a big cinema in the museum and watched a movie about the first landing on the moon. To lighten the mood about Corana we went shopping in the city and drove home. At 19:00 we started the farewell party one day earlier because the people from Norway and Spain were leaving on Friday. We had a lot of fun because we were singing and dancing the rest of the night. The last thing we got were the certificates from the project and then we drove home. When we were home we felt asleep right away because we were really tired and we needed to get up early because the people from Spain and Norway.

Friday 13th, March

The first thing on Friday was the leaving of the Norway and the Spain people. After that we ate breakfast at the school and started to write down our blogs. After that we cleaned up our room and made it ready for some classes again.
