Atomium

- ° it's a large statue of an atom
- ° inside is an elevator to get up at the top
- ° there is a light show in some atom balls
- ° our opinion
- ° it's a cool place to visit as a teenager
- ° 8 / 10

Chocolate factory

- .We first learned about the history of the cocoa, Spain played a really important role on it.
- .We learnt about all the materials that ancient people used to make chocolate.
- .Therefore, we saw some different types of chocolate that exist and we tasted them.
- .Finally we saw someone doing the chocolate and we tried it too and it was delicious.
- .We recommend it to people of all ages and our rate is 9/10.

EU Parliament

.On monday we met the other countries at the EU parliament.

.The EUParliament is a prliament where representntatives meet and discuss what is best for the EU and the countries in it.

What we do

.First we had to go through securityc and had to put on masks. Then we met Jannes and he held a presentation on the EU. It lasted for 45 minutes. After he was done we visited the Room of Parliament and the saw where the politicians discuss EU matters. He told us about the room and we took some pictures. We drank some water from a water dispenser and left the parliament.

What we think

.We do not think the EU parliament is very good for young people, it was much information at once and it was hard to keep track of everything he said.

.For people who are interested in the EU and much information about it, it might be exciting to go to the parliament. We give the parliament a 3 out of 10. Because it was not made for teenagers, but for older people who are interested in this.
